Hydrometer (hɒidrǫ·mĭtər) [mod. f. Gr. *ὕδρο-* water + -meter.]

1 *Hydrometers* (first recorded 1768) was app. adopted from English but has commonly the sense: An instrument for measuring the specific gravity of liquids, or sometimes (as in *Archimedes Hydrometer*) for finding the specific gravity of other liquids or solids.

The common type consists of a graduated stem having a hollow bulb and a weight at its lower end, so that with the stem upright in a liquid, the specific gravity of which is indicated by the depth to which the stem is immersed. Special names are given to it as constructed for particular liquids, as *alcoholometer*, *acidometer*, *lact meter*, etc.

Nicholson's Hydrometer consists of a brass cylinder having a small pan supported on a stem above the water and another pan depressed below in the water, the specific gravity of a solid body is calculated from the difference of its weights in air and in water, as determined by weighing it in the upper and lower pans respectively.

Hyper- (haɪpə), *prefix*, repr. Gr. *ὑπερ-* (*ὑπὲρ* prep and adv, 'over, beyond, over much, above measure'), in Gr combined adverbially with verbs, in the local sense 'over, above, beyond', as *ὑπερβαίνειν* to step over, overstep, cross, *ὑπερβάλλειν* to throw over or beyond, and hence in the adjectives and substantives therefrom derived, 'overgoing across, transposed (cf Hyperbaton), *ὑπερβολή* a throwing over or beyond, overshooting, excess, extravagance, Hyperbole, *ὑπερβολικός* Hyperbolic Also with adjectives formed on substantive stems, implying that the thing or quality is present over or beyond the ordinary degree, as *ὑπέρφυης* over-darling, high-spirited, *ὑπέρθυμος* of overwhelming might, and later with ordinary adjectives with the sense 'exceedingly', as *ὑπέρμεγας* immensely great, *ὑπέρκαλος* exceedingly beautiful In this sense also sometimes with verbs, as *ὑπερφιλεῖν* to love exceedingly, *ὑπερεχθαίρειν* to hate exceedingly Also combined prepositionally with sbs, forming adjs with the sense 'lying or going beyond, surpassing', as *ὑπερῴδηστος* that is beyond the north wind, Hyperborean, *ὑπερώριος* lying over the frontier, *ὑπεροφρύοισι* that is above the heavens, *ὑπέρθυρον* more than divine, *ὑπέρμετρος* going beyond measure (or metre), whence also with sbs from adjs, as *ὑπερθύριον* the lintel of a door, *ὑπερμετρία* a passing all measure

Comparatively few of these have come down or been adopted in English, *hyperbole*, *hyperborean*, with their derivatives, being the chief, but from the 17th century *hyper-* has been extensively used, more or less on Greek analogies, in the formation of new compounds, and has even become a kind of living element, freely prefixed to adjectives and substantives, as in groups 1 and 4 below

One of the conic sections, a plane curve consisting of two separate, equal and similar, infinite branches, formed by the intersection of a plane with both branches of a double cone (i e two similar cones on opposite sides of the same vertex) It may also be defined as a curve in which the focal distance of any point bears to its distance from the directrix a constant ratio greater than unity It has two foci, one for each branch, and two asymptotes, which intersect in the centre of the curve, midway between the vertices of its two branches (Often applied to one branch of the curve)

Hypnotism (hi·pnătizm) [f. Hypnotic-ism + -ism] This word is due to Dr James Braid of Manchester, who in 1843 introduced the term *neuro-hypnotism* for 'the state or condition of nervous sleep', and in 1843 used the shortened form *hypnotism*, when the context made the sense plain]

1 The process of hypnotizing, or artificially producing a state in which the subject appears to be in a deep sleep, without any power of changing his mental or physical condition, except under the influence of some external suggestion or direction, to which he is involuntarily and unconsciously obedient. On recovering from this condition, the person has usually no remembrance of what he has said or done during the hypnotic state The term is also applied to the branch of science which deals with the production of this state, and its causes and phenomena See Braidism, Mesmerism

The usual way of inducing the state consists in causing a person to look steadily, for several minutes, with complete concentration of the attention, at a bright or conspicuous object placed above and in front of the eyes at so short a distance that the convergence of the optic axes can only be accomplished with effort.

1852 Braid in *Trans Brit Assoc* (29 June), Practical Essay on the Curative Agency of Neuro-Hypnotism . 1843 — *Neurypnol.* 13 By the term 'Neuro-Hypnotism' then, is to be understood 'nervous sleep', and, for the sake of brevity, suppressing the prefix 'neuro', by the terms—*Hypnotic*, will be understood 'The state or condition of *nervous* sleep'; *Hypnotise*, 'To induce *nervous* sleep'; *Hypnotised*, 'One who has been put into the state of *nervous* sleep'; *Hypnotism*, '*Nervous* sleep'; *Hypnotist*, 'One who practises Neuro-Hypnotism' 1847-9 Todd *Cycl Anat* IV 60/2 Modes of inducing somnambulism practised under the designation of hypnotism 1852 Braid (*title*) Magic, Witchcraft, Animal Magnetism, Hypnotism and Electro Biology (ed 3) 1883 *19th Cent* Oct 696 Under the name of Hypnotism, the subject has after a long interval reappeared on the scientific horizon 1892 *Brit Med Jrnl* 27 Aug 459 Hypnotism is an agent of great value in the treatment of chronic alcoholism 1893 *Pall Mall G* 10 Jan 1/3 Hypnotism is the science which deals with the phenomena of a peculiar mental state produced by artificial means 1898 *Times* 14 July 14/3 The habitual use of hypnotism on women is greatly injurious, both morally and intellectually

Hypo- (hipo, hapo), before vowels also hyp-, *prefix*, repr Gr *ὑπο-*, *ὑπ-* (*ὑφ* prep and adv. under) = L. *sub-*), largely employed in Greek in the formation of verbs, adjectives, and substantives

With verbs, and their derivatives, *ὑπο-* had the senses 'under beneath, down, from below', underhand, secretly, in a subordinate degree, slightly' With adjectives and substantives, *ὑπο-* had the local sense 'beneath, under' in a prepositional relation to the substantive implied in the radical part, or the sense 'in a lower relation, in a lower degree, slightly, somewhat, a little' in an adverbial relation Few Greek words containing the prefix came down through late Latin and Fr into English, the only notable exception being the ecclesiastical words *hypocrite* and *hypocrisy*, found soon after 1200 the derivatives, *hypocrite*, *-al*, etc are later, of 16th c A few technical words, e g *hypostasis*, *hypostasy*, occur (though hardly in Eng.) in end of 14th c considerable number, including *hypochondria*, *chondriac*, *hypodiastole*, *hypodiastolic*, *hypogee*, *hypogeum*, *hypotrachelium*, *hypotrochium*, appear in 16th c, and others, as *hypocaust*, *hypogastric*, *gastrium*, *hypogeal*, in 17th c. But the great majority of the *hypo-* formations belong to the 19th century of modern science, and have no actual Greek prototypes, but are formed (usually) on Greek elements, and more or less in accordance with Greek principles of word formation *Hypo-* has not, like *hyper*, become a living element, capable of being prefixed at will to words of any origin

The first vowel in Gr *ὑπο*, I. *hypo-*, is short, and all the early words in English were introduced with the *y* short as in *hypocrite*, *hypocrisy*, etc. The *y* is marked as short in all compounds with *hypo-* in Prononcing Dictionary down to the middle of the 19th c. Some later Dictionaries, while retaining short *y* under stress, primary or secondary, as in *hypocaust*, *hypothesis*, make it long (or ambiguous) in secondary syllables, as in *hypothesize*, *hypothesize*. But the later tendency in the South of England has been to treat it in all positions except before two consonants as (ai), and, against etymology and history, to say *hʃpounfhaik*, *hʃpoutaizl*, etc

1 1. In words from Greek the most important of these are *hypochondria*, *hypocrisy*, *hypocrite*, *hypostasis*, *hypothec*, *hypothesis*, and their derivatives

2 In modern formations, with sense 'under, beneath, below', of relative position, sometimes antithetical to terms in Epi- or Hyper- In one set (*a*), *hypo-* has a prepositional relation governing the sb occurring or implied in the following element, as in *hypobasal*, Hypobranchial, Hypoglossal, in another (*b*), *hypo-* qualifies the second element adverbially or attributively, signifying that this is itself the *nether* or *lower* of two (or more), as in Hypoblast, *hypomere*, *hypozoa* (animals low in the scale)

3 *Also* a Prefixed to the names of musical modes in *hypoaeolian*, *-dorian*, *-ionian*, *-lydian*, *-mixolydian*, *-phrygian*, to denote either (*a*) the grave modes in Ancient Greek music, beginning at a definite interval below the ordinary *Æolian*, *Dorian*, etc or (*b*) the 'plagal' modes in mediæval music, each of which has a compass a fourth below that of the corresponding 'authentic' mode Also formerly in names of intervals measured down wards, as *hypodiapason*, *diapente*, *diatessaron*, *ditone* (see Diapason, etc) (Cf Hyper- 2)

4 'To some extent', 'slightly', 'somewhat', in many adjectives, similarly in substantives, with the sense 'slight' or 'deficient' These words belong chiefly to pathology, and are the opposites of similar formations beginning with Hyper- II

5 In Chemistry, *hypo-* (in contrast to Hyper- 7) is used to name an oxygen compound lower in the series than that having the simple name without *hypo-*, thus, *sulphurous acid* = H_2SO_3, *hyposulphurous acid* = H_2SO_2, *vanadic oxide* V_2O_5, *hypovanadic oxide* $V_2O_4(VO_2)$, *vanadious oxide* V_2O_3, *hypovanadious oxide* $V_2O_3(VO)$

II The more important words belonging to all these groups appear in their alphabetical order as main words, others of less importance or less frequent use follow here. (In many of these the immediate derivation is obvious, they being simply formed by prefixing *hypo* to another word, the etymology of which will be found in its place e.g. *hypoarolic*, *hypo-* + ATOTIC, etc.)

I.

I (aɪ), the ninth letter and third vowel of the Roman alphabet, going back through the Greek *Iota* to the Semitic *Yod* The simple form I of the character in Greek from about 500 B C, and in the Roman alphabet, was reduced from a more complex Early Greek form Ꮖ, which originated in the Phœnician ɀ The Semitic letter represents a consonant (= English Y in *yellow, yoke*, etc), but this forms diphthongs with preceding *a* and *e*, and 'quiesces' in a preceding *s*, making long *i* It is thus, in the body or at the end of a word, often an indication of the vowel *ī*, and it was adopted as the symbol of the *s* vowel by the Greeks, who had no *y* consonant In the Latin alphabet, on the other hand, it was used with both values, viz that of *s* vowel (long and short), and *y* consonant, as in *ībidem, ibis, iacus, Iupiter, Iouis* Even when the consonant passed in Romanic from the sound of Y to that of 'G soft' (Italian *gi-*, Eng and OF *j*), and subsequently, in some languages, to other sounds, it continued for many centuries to be expressed by the same letter as the vowel I, with which it had no longer phonetic relations At length, after 1600 (in England chiefly 1630–1640), a differentiation was made, the consonant being expressed by the character J, in its origin merely a variant form of I i, used in certain positions, for the history of which see the ne t letter J The result is that, in the modern development of the Roman alphabet, the ninth letter has been split into two, I and J, and I remains only a vowel

The original value of the Græco Roman I vowel when long was that of the 'high front-narrow' vowel of Bell's scale, which the letter still has in all the continental languages, and in some English words thence adopted, as Lourdes, machine, clique, casino, a sound which in native English words is now normally represented by *ē, ee*, in *be, see, mete, meet* The short *s* was doubtless originally the true 'short' of the same sound, the 'narrow' *s* in French *fini*, Italian *fortissimo*, but, in Teutonic, the short vowel represented by *s* has probably always been the corresponding 'wide' vowel (ɪ), as in English *finny, missing* Thus, our current sound of short *s* in *him, it, has*, apparently, come down unchanged from OE times Long *s*, on the other hand, has undergone a great change, having about the beginning of the modern period changed into a diphthong with *s* as its second element This evidently arose from the practice of beginning the utterance of the long vowel before the vocal organs had quite attained the very close position of long (*ī*), so that the sound began with an opener and less definite vowel quality, which tended in use to become more and more distinct from the second element The exact quality of the first element at present is difficult to fix it varies greatly in different localities and in different individuals. We have symbolized the diphthong by (aɪ), taking the first element as the 'mid mixed-wide' vowel of Melville Bell's scale, the general 'obscure vowel' of English, but some phonetists take it as the 'mid-back' or the 'low mixed' vowel, wide or narrow, and it may be heard locally as the 'mid front' and 'low-front' wide or narrow This diphthongization of original long *ī* is not peculiar to English, but has taken place also in German and Dutch The difference is that in English the old simple vowel symbol is retained for the new diphthong, while in German and Dutch this is expressed by the new diphthongal symbols *ei* and *ij* (formerly *y*) cf OF, OHG, OI *ic min* with Eng *mine*, Ger *mein*, Du *mijn*, formerly *myn*

In addition to the two normal modern English values (ɪ) and (aɪ), the letter *s* has others, due either to the disturbing influence of a following *r*, to the retention by foreign words of their foreign sounds, or to the obscuring effect of absence of stress in certain positions The sounds that occur in stressed syllables are the following

1	ɪ in hɪt (hɪt)	4	ī in fīr (fīr)
2	əɪ „ ɪce (əɪs)	5	ī „ pɪque (pīk)
3	əɪə „ hɪre (həɪrə)	6	īə „ cɪmɪter (cɪmɪtə)

All these may occur also in unstressed syllables, which have besides

7 ə in nadɪr (nēɪdəɹ),
8 ɪ „ trɪnity (trɪ nɪtɪ),

the last a slightly dulled power of (ɪ) nearly = (ɤ)

The combination *ɪe* has the value of No 2 in *die, dies, died, etc*, of Nos 5 and 6 in *field, chief, grieve, pier, grenadier*, etc , exceptionally that of (e) in *friend*, (ɪ) in *sieve* Finally, and unstressed, it has that of simple (ɪ), as in *nerve, cities*, pitted

The combinations *ai, ei, oi* represent diphthongs in *Isaiah* (əɪzaɪ'ə), *aisle* (əɪl), *either* (əɪ'dəɹ), *oil* (oɪl), etc , but *ai, ei* merely represent *ɪ, ē, ī* or *ī*ə in *aim* (ɛɪm), *air* (ɛəɹ), *rein* (rɛɪn), *feint, heir* (fɛɪt), *receive, receipt, leith* (lɪθ), *weir* (wɪəɹ), etc

Before another vowel in the suffixes *-ian, -ier, -ion, -ious*, etc , *s* has often the consonantal value of *y*, or a value which readily passes into it e g *Christian, clothier, courtier, million, onion, union, copious, previous*, after certain consonants, this *y* value is merged in the consonant, which it palatalizes, as in *spacious* (spēɪ'ʃəs), *nation* (nēɪ'ʃən), *soldier* (sōu'ldʒəɹ), *fusion* (fiu'ʒən), *Persia* (pɹəʃə'), *hosier* (hōu'ʒəɹ), *fashion* (fɛ'ʃən)

The minuscule or 'small letter' *s* is now surmounted by a dot This is no original part of the letter, but is derived from a diacritic mark, like an acute accent, used to put to distinct the *s* in positions in which it might have been taken merely for the stroke of another letter It appears to have begun in Latin MSS about the 11th c with the *s* in such words as *ingenii*, and to have been thence extended to *s* in contiguity with *m, n*, or *u*, and finally, to have been used with *s* in all positions The accent form of the mark, seen in Caxton's type and in modern German, was in 15th c handwriting often developed into a long curved flourish, but in books printed in Roman type it was reduced to the round dot now in use In chirography the dot still largely serves its original purpose of indicating the *s*, hence the phrase *to dot the i's*

The same cause that led to the dotting of *s* contributed largely to the formation of *j*, originally merely a lengthened or tailed *s* used finally as a more distinctive form, especially when two *s*'s came together, as in *ingenuy*, or in the numerals *vj, iij, viij*, etc also to the substitution of *y* for *s*, especially in contiguity with *m, n, u*, etc , or when final In English it became at length a kind of scribal canon that *s* must not be used as *s* final letter, but must in this position be changed to *y*, but in inflected forms where the *s* was not final, it was retained, hence our current spellings, *city, cities, holy, holier, holiest, carry, carries, carried, carrier, weary, wearisome*, etc In modern English no native word ends in *s*, in alien or adopted words so ending, the *s* is usually pronounced (əɪ) in *cīrcus, foci, magi*, and other Latin plurals, also in *Rabbi, Rabboni, Bibli, Levi*, and other Hebrew names, but as (ɪ) in *alkali, Cadi, Mahdi*, and other foreign words of recent adoption

5 The Roman numeral symbol for One

This was not originally the letter but a simple line denoting unity It is repeated for II, III, IIII, formerly, as still on a dial plate, to 4 (IIII) These are added to symbols of higher numbers, as VI = 6, XII = 12, XXIII = 23, LI = 51, CII = 102 etc Prefixed to V and X, it diminishes them by 1 IV = 4, IX = 9 (In MS MSS and early printed books these symbols are very frequent instead of the corresponding words, being usually written with a point before and after, thus, 'the haddie mit 'x. kayliches') 1450 W Sommer in *Journ C Engl Lett* 4 He, with 9 or 10 of his men 1727–41 Chambers *Cycl* s v, I, in the ordinary Roman way of numbering, signifies one, and when repeated, signifies as many units as it is repeated times

6 *Math* In Higher Algebra, *x* or *y* is often used for the imaginary quantity $\sqrt{-1}$, square root of minus one In Quaternions *i, j, k* are symbols of vectors, as distinguished from scalars

OE *ic* remained in MF as *u*, *ik* in the north, in midl and south it was early palatalized to *ich* (itʃ) In north and midl the final consonant began by 12th c to be dropped before a consonant, the pronoun being in this position reduced to *i*, in the 14th c *ik* and *s* were still used before vowel and consonant respectively in the north, but *I* alone appears in north and midl after c 1400 In the south, *ich* remained much longer, esp before an initial vowel, in which position, also, it was in 16th c commonly reduced to *ch*, in writing conjoined with the verb, as in *cham* I am, *chave* I have, *chill* I will, *chot* I wot (initial *h* and *w* being elided) Before a consonant, *ch* was sometimes extended to *che*, as in Shakspere's 'che vor ye', and, in the forms *ich*, *itch*, *ch*-, *che*, or *utch*-, the pronoun remained in s w dialects till the 18th or first half of the 19th c The simple vowel *i*, to which the pronoun was elsewhere reduced, was in course of time diphthongized (as it, ɔi, ei, ɛi, ai, or ai), at first prob. only when under stress, but at length when unstressed also, a relic of the earlier unstressed form remains in north Eng dialects in the enclitic pronoun following a verb, which is still (t) or (ɪ), as in *wad I* 'would I', *did-I*, pronounced *waddy*, *diddy* (wa di, di di) In most northern dialects a new unstressed form originated from the diphthongal *I* by dropping the second element, and retaining the first (ɑ, ɛ, ä) as *eh*, *a*, by the lengthening of this again there has been developed a new stressed form (æ, ä, ē) written *ah*, *aa*, *aw*, *oa*, which is now the ordinary form of the pronoun in north Eng and Sc dialects

The ME *ic*, *ik*, *ich*, were also spelt *yk*, *ych*(*e*, *i* varied with *y* or *I* (the MS character for these being often the same), also with *y*, *Y*, and finally at the introduction of printing settled down as *I* Both *i* and *ich* were often written in combination with the verb, as in *idude* I did, *icham* I am, *ichill* I will, these last were often erroneously divided by later scribes and printers as *I cham*, *I chill* (also erratically spelt *c'ham*, *ch'am*, etc)

The history and uses of the oblique forms will be found in the separate articles ME, MINE, MY, OUR, OURS, etc]

In early ME, this prefix regularly appears as *i*, words which did not survive to c 1340 have rarely any other form Later, *y* became (for graphic reasons) more usual, and was the form in which the prefix was borrowed from I ydgate, etc, by the Spenserian archaists, as in *yclad*, *yclept*, *ycleped*, *ycleaped*, *yclept*, *ycleped*, etc In this Dictionary, the earlier words which are known only with the *i* spelling, are entered under I, those which survived to have *y*, and esp the archaistic *ycleaped*, *ycleped*, etc appear under Y In MSS, the *i* often stands separate from the rest of the word, or is united to it by a hyphen, the latter practice is frequently followed by editors, and it has been adopted here, in order to render the character and sense of these words more distinct to the eye

Ic, obs form of I, *pron*

-ic (formerly **-ick**, **-ik(e**, **-ique**), *suffix*, primarily forming adjs, many of which are used as sbs The latter have also the form **-ics** see 2

1 In adjs., immediately representing F *-ique*, ad L *-icus*, of Latin origin, as in *civic* n, *classic* n, *public* sb, *domestic* sb, *agnatic* sb, in ad Lat use of, as in *κομικὸς ὁ cómic* n, *γραμματικὸς ὁ grammatic* n, *ποιητικὸς poetic* sb This was in Gr one of the commonest of suffixes, forming adjs, with the sense 'after the manner of', 'of the nature of', 'pertaining to', 'of' Its use in L was much more restricted, and it ceased to be a living formative, except in the compound suffix *-atic* (see -ATIC), and in words formed from Greek, or on Greek types These were very numerous in late and med L, whence they passed into the modern langs, since the 16th c they have been taken directly from Gr, or formed upon Gr elements, and in some recent (esp scientific) terms on words from L or other sources, as *carbonic*, *oratoric*, *artistic*, *bardic*, *scaldic*, *felspathic*, *Icelandic*, *Hyronic* In *Chemistry*, the suffix *-ic* is specifically employed to form the names of oxygen acids and other compounds having a higher degree of oxidation than those whose names end in *-ous*, e g *chloric acid* HO_3Cl, *chlorous acid* HO_2Cl, *sulphuric acid* H_2SO_4, *sulphurous acid* H_2SO_3

At the time when this nomenclature was introduced only two such compounds were provided for In many cases other oxygen compounds have since been obtained, but the names in *-ic* and *-ous* have been retained in their original applications, and prefixes as *per-*, *hyper-*, *hypo-* were employed to denominate the addition of compounds

1897 THOMSON *Chem* II 254 The French chemists made some of the names of the combustible acids end in *-ic*, if they were saturated with oxygen, and others in *-ous*, as if they were capable of combining with an additional dose The fact is, that some of them are, strictly speaking, saturated with oxygen, for all of them are capable of combining with more **1849** D CAMERON *Instrs Chem* 4 Acids formed by oxygen with another element, are distinguished by the termination *-ous*, given to acids with a lesser quantity of oxygen, and in acids with a greater quantity

2 Already in Gr, adjs in *-ικός* were used also lutely as sbs, e g *ἡ μουσικὴ* (sc *τέχνη*), or *ἡ μουσικός* (*ἀνήρ*), the art, or the artist, of music, as *Στωϊκοὶ* (*ἄνδρες*), the men of the porch, Stoic philosophers (*ἀνήρ*) able to discern, critic, hence in L *Stoici*, *criticus*, etc., also, in sing form, in names of arts (sc. *τέχνη*, or systems of thought, knowledge, or action (sc. *θεωρία*, *φιλοσοφία*), e g *ἡ μουσικὴ* the art of the Muses, music, *ἡ ῥητορικὴ* the oratorical art, rhetoric, *ἡ ἰδιωτικὴ* theory of words, *ἡ ἀστρικὴ* science of vision, optics, and in neuter pl, as expressions for the affairs or matters pertaining to some department and hence as names of treatises on these subjects, as *τὰ οἰκονομικὰ* things pertaining to the management of a household, a treatise on this, economics Sometimes both forms were in use with a distinction of sense, e g *ἡ πολιτικὴ* the art of the statesman, political science, *τὰ πολιτικὰ* affairs of state, politics, this distinction tended however to become obliterated, as in *ἡ τακτικὴ*, *τὰ τακτικὰ* tactics *ἡ φυσικὴ*, *τὰ φυσικὰ* physics In pairs like *φυσικὴ*, *φυσικὰ* both forms gave regularly in L form in *-ica*, as *physica*, which might be taken as fem sing or neuter pl, hence there was in med L considerable fluctuation in the grammatical treatment of these words In the Romanic langs (It, Sp *-tica*, F *-tique*), as also in Ger (*-tik*), they were regularly treated as fem sing, though in French from the 16th c, sometimes as plural (*les mathématiques*)

In English, such words of this class as were in use before 1600 had the singular form, and were taken as fem sing, as *logic*, *rhetoric*, *arithmetic*, *magike*, *musike*, *logicke*, *tactique*, *retorique*, *mathematique* (the *ik*, *mechanique*, *economique*, *ethyque* (*ik*) this form is retained in *arithmetic*, *logic*, *magic*, *music*, *rhetoric* though *logics* has also been used) But, from the 14th c, forms in *-ics* (*-tiques* occur as names of treatises (*tiques* for names in use) In Romanic langs, as *-ica*, *-ique* and the 2nd half of the 16th c this form is found applied to the subject-matter of such treatises, in *mathematics*, *economics*, etc From 1600 onward this has been the accepted form with names of sciences, as *acoustics*, *conic dynamics*, *ethics*, *linguistics*, *metaphysics*, *optics* *statics* or matters of practice, as *athletics*, *athletic exercises*, *gymnastics*, *politics* (*politic* is now the name of science), even though they have the form in *-ics*, are now construed as singular, as in 'mathematics is the science of quantity', as students are mathematicians', in recent times some writers following German or French usage, have preferred to use a form in *-ic*, as in *dialectic*, *idiomatic ethic*, *metaphysic*, *poetic*, etc Names of practical matters as *gymnastics*, *politics*, *tactics*, usually remain plural, in construction as well as in form

3 Besides the preceding there are many sbs formed directly from adjectives in *-ic* taken absolutely, either after ancient models or on ancient analogies, as in names of medical agents, as *acid pharmic*, *emetic*, *cosmetic*, *hidrotic* (pl *emetics*, etc), in names of styles of poetry or metres, as *epic*, *lyric*, *Anacreontic*, *tanabic*, and in words of various kinds, as *domestic*, *rustic catholic*, *classic*, *mechanic*, *lunatic* Words in *-ic* from Gr or L have the stress regularly on the penult, e g *mechanic*, *dramatic*, *emetic*, *fanatic* The exceptions, as *arithmetic*, *arsenic*, *catholic*, *heretic*, *rhetoric*, *lunatic*, are chiefly words taken directly from French, in which originally the final syllable had the main stress, and the antepenult a secondary stress (*the forty-nine*), which afterwards became the primary in accordance with the regular treatment of French words (e g *-able*, *-ance*, *-ity*, in English

A few adjs in -ic form advs in *-ally*, as *public ly*, *frantically*, *heroically*, but the adv is usually in -ICALLY, from the secondary adj in -ICAL Derivative abstract sbs are formed in -ICITY, as *domestically*, *idiomaticity*, and agent nouns in -ICIAN as *arithmetician*, *musician*, *physician*

I-cached, **I cakeled**, ME pa pples of CATCH, CACKLE *vbs* **Icaein** see under ICHE

-ical, a compound *suffix*, f *-IC* + *-AL*, sometimes forming an adj from a sb in *-ic*, as *music*, *musical*, but more frequently a secondary adj, as *comic*, *comical*, *historic*, *historical* Its origin appears to have been the formation in late L of adjs in *-alis* on sbs in *-icus*, or in *-icē*, e g *grammaticus* grammarian, *grammaticē* grammar, *grammaticalis* grammatical, *clericus* clergyman, clerk, *clericalis* clerical So in med L, *astronomicalis*, *dominicalis*, *medicalis*, *ministralis*, *physicalis* In French, adjs of this type are few, and mostly taken directly from L formations, as *chirurgical clerical*, *grammatical*, *médical*, etc But in English they are exceedingly numerous, existing not only in all cases in which the term in *-ic* is a sb, but also as the direct representatives of L and Gr adjs in *-icus* Thus we find before 1600 *canonical*, *chirurgical*, *domestical*, *musical*, *philosophical*, *physical* Many adjs have a form both in *-ic* and *-ical*, and in such cases that in *-ical* is usually the earlier and that more used Often also the form in *-ic* is restricted to the sense 'of' or 'of the nature of' the subject in question, while that in *-ical* is wider or more transferred senses, including that of 'pertaining connected' or 'dealing with' the subject Of 'economic science', 'an *economical* wife', '*prophetic* words' '*prophetical* studies', 'a *comic* song', a *comical* incident', 'the *tragic* muse', 'his *tragical* fate' A *historic* book is one mentioned or famous in history, a *historical* treatise contains or deals with history But in many cases this distinction is, from the nature of the subject, difficult to maintain, or entirely inappreciable

Adjectives of locality, nationality, and language in *-ic* like *Arabic*, *Cretonic*, and those of chemical and other technical nomenclature as *acetic*, *boric*, *folic*, *nitric*, *oxalic*, *organic*, *magnetic*, have usually no secondary form in *-al*

Hence, some derivative sbs in *-icality*, as *technicality*

-ically, subfix ending, f *-ICAL* + *-LY*[2], forming advs from adjs in *-ical*, which are also used as the advs from the corresponding adjs in *-ic* Thus *historic*, *historical*, adv *historically* *poetic*, *poetical*, adv *poetically* The adv is almost always in *-ically* even when only the adj in *-ic* is in current use, as in *athletically*, *hypnotically*, *phlegmatically*, *rustically*, *sympathetically*

Id (id) *Biol.* [Formed in German (1891) by Weismann (see first quot.)] In Weismann's theory of heredity. A unit of germ-plasm or idioplasm

1893 tr. *Weismann's Germ Plasm* 1. 69 We are led to the assumption of groups composed of determinants, which in their turn are made up of biophors. These are the units which I formulated long ago to which the name of *ancestral germ plasm* is given I shall now speak of them as 'ids', a term which recalls the 'idioplasm of Nägeli 1893 H. Haddon *in Contemp. Rev.* July 57 Each of the reproductive cells of an organism is supposed to contain in its nucleus a number of 'ids', and each id represents the personality as an ancestral member of the species or of an antecedent species 1895 Vines *Text-bk. Bot.* 782 When in hybridisation all the parental ids exert their full influence the offspring is precisely intermediate in character

-id, *suffix*[1], repr. Fr. *-ide*, L. *-id-us*, used to form adjectives, chiefly from verbs with *e*-stems, as *acidus* acid, *f. acere* to be sour, *avidus* avid, *pavidus* fearful, *frigidus* frigid, *fervidus* fervid, *pla cidus* placid, *splendidus* splendid, *stupidus* stupid, etc., etc., but also from a few verbs with *i* or consonant stems, as *fluidus* fluid, *f. fluĕre* to flow, *vividus* vivid, *f. vivĕre* to live, and occas. from substantives, as *fimidus* fumid, *f. fumus* smoke, *morbidus* morbid, *f. morbus* disease, *solidus* solid, *f. solum* ground, etc. In the earlier (Latin) words the *id* came through Fr., on the analogy of the *-e*, others have been taken from Latin direct, the suffix is not a living formative in Eng.

-id, *suffix*[2], corresp. to F. *-ide*, in sbs. derived from Latin sbs. in *-is, -idis* adopted from Greek sbs. in *-is, -idos* such as *carotid* (sc. (*artĕria*) *soporifera*), *chrysalid*, *hybrid*, *pyramid* (cf. F. *pyramide*) This formative occurs in certain botanical terms, as *amaryllid, epacrid, orchid* (etymologically these should denote the plants *amaryllis, epacris*, and *orchis* respectively, but they are actually used to denote a member of the order of which these are the typical genera (*Amaryllidĕæ, Epacridĕæ, Orchidĕæ*)

-id, *suffix*[3], in zoological appellatives, sb. and adj. (*a*) formed from Latin names of families in *-id-æ*, pl. of *-ides*, repr. Gr. *-idæs*, patronymic suffix of sons of, as *Arancid*, a member of the family *Aranеidæ*; (*b*) formed from Latin names of Classes, etc., in *-id-a*, taken as neut. pl. of *-ides* = Gr. *-idæs* as *Arachnid* a member of the Class *Arachnida* Some of the terms have come through Fr. forms in *-ide*. See idan

-id, *suffix*[4], an early spelling of the chemical suffix -ide, still retained by some, esp. in U.S.

Idant (ai·dănt *Biol.* [Arbitrarily f. Id] One of the chromatin bodies in the nucleus of a reproductive or other cell, regarded as consisting of 'ids' (see Id)

1893 tr. *Weismann's Germ Plasm* 1. 67 Those rod like, loop-like, or granular masses of chromatin in the nucleus considered equivalent to one or aggregation of ids, I have proposed to call *idants* *Ibid.* in Introd. 23 The germ plasm in both nuclei becomes contracted, so as to give rise to nuclear rods or idants the number of these plants is the same in both of the conjugating cells. 1895 Mivart in *Harper's Mag.* Mar. 634

Ide[2], see Idee

-ide, *Chem.*, a suffix used to form names of simple compounds of an element with another element or a radical. It is added to the stem or in abbreviated form of the name, and was first used in *oxide*, Lavoisier, from *oxygen*, whence it was extended to other elements, sometimes displacing other derivatives in *-et* and previously used in *chloride of nitrogen* or (more lately) *nitrogen chloride*, *hydrogen arsenide*, *arseniuret*

In systematic terminology a compound of oxygen with any other element is called an *oxide* in other binary compounds it is combined with the more electropositive of the two elements thus *fluoric*, *chlorine*, *bromine*, *iodine* form with each other in order and with any other element or radical except oxygen, *fluorides*, *chlorides*, *bromides*, *iodides*; *sulphur*, selenium, tellurium form with elements other than these, *sulphides*, *selenides*, *tellurides*; and so on. Examples are *hydrogen chloride*, sulphur bromide, carbon sulphide, hydrogen selenide, telluride, phosphide, arsenide, cyanide, boron carbide, boron hydride, hydrogen hydride ethyl hydride, copper chloride, carbide, nitride, hydride of metals and organic radicals The suffix is also used in Amide, Anhydride Cyanide Ammonide, and other derivatives from names of compound radicals. *Mono-, di-, tetra-, penta-*, etc. are prefixed to indicate the number of combining equivalents as in sulphur trioxide, SO_3 (= SO_2, sulphur *dioxide* SO_2) and so on

Idealism (ədĭ'əlĭz'm) [ad. F. *idéalisme* (1752 in Hatz.-Darm.) or Ger. *idealismus*, f. IDEAL.]

1 *Philos.* Any system of thought or philosophy in which the object of external perception is held to consist, either in itself, or as perceived, of ideas (in various senses of the word see IDEA *sb.*)

Subjective Idealism is the opinion that the object of external perception consists, whether in itself or as known to us, in ideas of the perceiving mind. *Critical* or *Transcendental Idealism*, the opinion (of Kant) that it, together with the whole contents of our experience, consists, as known to us, but not necessarily in itself, of such ideas. *Objective Idealism*, the opinion (of Schelling) that while, as known to us, it consists of such ideas, it consists also, as it is in itself, of ideas identical with these. *Absolute Idealism*, (*a*) the opinion (of Hegel) that it consists, not only as known to us,

but in itself, of ideas, not however ours, but those of the universal mind, (*b*) also applied more generally to other forms of idealism which do not suppose an independent reality underlying our ideas of external objects.

1796 W Taylor in *Monthly Rev* XX. 576 He [Parmenides] thus prepared arguments for scepticism, and made the first approaches towards idealism 1803 — in *Monthly Mag* XIV. 487 The system of Berkeley is espoused under the name Idealism by writers of reputation in Germany 1839 Sir W Hamilton *Discuss* (1852) 196 A doctrine of Absolute Idealism was, without communication, contemporaneously promulgated by Berkeley and Collier 1895 Mahaffy in *Contemp Rev* Dec. 1 *Critique of Pure Reason* 166 *note*, Formal or critical idealism—the theory of Kant—which denies us a knowledge of things in themselves and maintains that we can know only phenomena. 1896 Dove *Logic Of Faith* v. § 2. 270 Absolute Idealism means that thought is the all 1885 Lilly *Ration* (1898) I 176 Shaftesbury retains a certain place as one of the few disciples of idealism who resisted the influence of Locke 1872 Mahaffy tr *Kant's Prolegomena* 61 My having given this my theory the name of transcendental idealism, can authorise no one to confound it with the empirical idealism of Descartes, *Ibid* 62, I now retract it (the word 'transcendental') and desire this idealism of mine to be entirely critical 1877 J. H. Stirling *Annot Schwegler's Handbk Hist Philos* 420 The idealism of Fichte that reduced all to the ego was the subjective idealism. Then Schelling, who gave to the object an equal basis beside the subject, but still under an idealistic point of view, is said to have given rise to the objective idealism; while Hegel, who gave to be subordinated all the thought alone, is styled the founder of the absolute idealism 1886 Clifford *Lect & Ess*, *Nature of Things in Themselves* 276 It may very well be that I myself am the only existence, but it is simply ridiculous to suppose that any body else is. The position of absolute idealism may, therefore, be left out of count 1887 J. Ferrier & Calderwood *Vocab Philos* 196 Subjective Idealism is the term applicable to the theories of Berkeley and Fichte. 1889 Courtney *Metaph* 137 Idealism resolves all our notions of the external world into the subjective affections of the thinking self

2. The practice of idealizing or tendency to idealize, the habit of representing things in an ideal form, or as they might be, imaginative treatment of a subject in art or literature, ideal style or character opp to *realism*. Also, aspiration after or pursuit of an ideal

The order of appearance of the senses in English does not correspond to their original development in Greek, where the sequence was probably: (1) unsubstantial form, phantom, unsubstantial form, image in water or a mirror, mental image, fancy, material image or statue', and finally, in Jewish and Christian use, 'image of a false god' In English this last was, under religious influence, the earliest, and in ME the only sense, hence (as also in Fr) came sense 2 These are the only proper uses of the word The other uses are 16th c adoptions of earlier Greek senses, often however coloured by association with sense 1
1 From Jewish and Christian use

-ier, a suffix forming nouns designating position, employment, or profession, derived from sbs, rarely agent nouns from vbs, (1) in words of ME age, in which the suffix is unstressed, and varies (or has varied) with *-yer*, as *collier, bowyer*, (2) in words of later date (since 16th c), in which the suffix is stressed, and varies with -EER, as *bombardier, cashier, cannonier* (-eer), *financier*

1 In words of ME age, the suffix is of obscure and app of diverse origin Among the earliest examples are *cottier* (*cotier*), *tilier*, and *bowyer* the first is a OF *cotier* = med L *cotārius*, and its retention of -ier is remarkable, because OF -ier normally became -er in AFr and Eng, as in *butler, draper, farmer* (see -ER² 2), *tiliere* (1250–1400), 'tiller, cultivator', appears to be an analogical formation on OE *tilia*, early ME *tilie*, on the analogy of such pairs as OE *hunta*, ME *huntere*, since the etymological formation would have been *tilere*, for *bowyer* (1297 *bowiare*, a 1450 *bowȝere, bowyere*), the suggestion has been made that the *i, y*, represents the ȝ of ME *boȝe*, BOW, but this is doubtful Other examples are *collier* (15th c *koliere, cholier, colyer*, etc), *lawyer* 1362 (but also, a 1400, *lawer*, *lockyer* (1407 *lokier*), *brazier* (1400–50 *brasier, brasyere*), *hellier, hillyer* (15th c *helier, helyer, hillyer*), *spurrier* a 1450, *halyer* 1479 (*haulyer* 1577), *grazier* c 1500 Of *glazier* (a 1400), *clothier, hosier, sawyer* (a 1500), *farrier, pavier, -iour* (16th c), there exist as early (in some cases earlier) forms in -er, *courier, cozier, furrier*, are 16th c forms altered from ME or OF agent-nouns in -our, *drovier gloster, kiddier*, are 16th c variants of *drover, gloser, kidder*, *lovier* a late vulgarism for *lover* In other words, as *carrier, courtier, currier, soldier*, the suffix is really -er (or earlier -our), the *i* belonging to the Eng. or F vb stem (See also -IOUR)

2 In words of later introduction, the suffix is the F -ier (—L -ārius see -ARY) The earlier of these, as *bombardier, cannonier* (-eer), *cashier, cavalier, chevalier, halberdier, harquebusier*, date from 16th c, others, as *brigadier, carabinier* (-eer), *cuirassier financier fusilier gondolier, grenadier*, from 17th or 18th c. Some, as *cordelier*, have taken the place of an earlier form in -er, which goes back to ME Many of these also occur with the spelling -eer, expressing the English pronunciation, in some this spelling has been established, and from them -EER has become a living English suffix, as in *auctioneer, charioteer, pamphleteer*

3 *Ignoration of the Elench*, a rare anglicized repr of the more usual Scholastic L attn **Ignoratio elenchi** (ignorā·ʃio ĕle·nkəi), a logical fallacy which consists in apparently refuting an opponent, while actually disproving some statement different from that advanced by him, also extended to any argument which is really irrelevant to its professed purpose

1830 DE QUINCEY *Bentley* Wks VII 176 The word ignore, which he threw in the teeth of Mr Boyle is in fact, Hibernism, which though not now used at all in England is obsolete, except in the use of grand juries (*Note* in H 23 1857) It was written in the summer of 1830 at which time no vestige of a suspicion had arisen that very soon the word would be called back or rather would be raised from a lifeless toleration in law books to a popular and universal circulation It was a word much wanted Yet there are pedants who would even now (1857) ignore this indispensable word 1838 *Penny Cycl* IX 480/2 When the bill is found not to be true or, as it is frequently called, 'ignored' the accused is discharged Sometimes, when the bill is ignored on account of some slip or error, the justice will direct the accused to be kept in custody 1880 *Law Times* XCV 28/1 the Lord Chief Justice suggested to the Grand Jury to ignore the bills but they returned true bills

The Romanized form of the abbreviation would be IHS, but from the entire or partial retention of the Greek form in Latin MSS as IHC or IHS, and subsequent forgetful ness of its origin, it has often been looked upon as a Latin abbreviation or contraction, and explained by some as standing for *Iesus Hominum Salvator*, Jesus Saviour of men, by others as *In Hoc Signo (vinces)*, in this sign (thou shalt conquer, or *In Hac Salus*, in this (cross) is salvation

Il, obs form of ILL

Il-1, assimilated form in I. of the prefix IN-2 before initial *l*, which is written in the same way in Eng, as in *il-lation*, *il luminate* Usually only one *l* is heard, but both (or a prolonged *l*) may be pronounced when distinctive emphasis is laid on the prefix, as in *il-lision*, *il lude*, distinguished from *e lusion*, *e-lude* For the varieties of meaning, 'in, on, into, upon', see IN-2

Il-2, assimilated form in L of the negative prefix IN-3 before initial *l*, which remains in the same form in Eng, as in *il-legal*, *il-legitimate*, *il literate* Also used in forming negatives in English on the analogy of L, as in ILOGICAL, ILOYAL, and in such nonce-words as *il-level*, *il locomotive*, etc When the main stress immediately follows, an effort is often made to give the separate effect of the prefix by pronouncing both *l*'s, or combining them in one prolonged *l*, this is especially the case when rhetorical stress is laid on the prefix, as in 'You call this a Liberal measure, I consider it thoroughly *il* liberal'

-il, -ile, *suffixes*, the Eng representatives of L *-ilis* and *-ilis*, forming adjectives, sometimes also substantives, as in *fazzilis* fossil, *ravilis* civil, *agilis agile*, *juvenilis* juvenile These suffixes are in origin the same, *viz -lis* with connective *i-*, which with *-i-* stems as *civi-s*, *hosti-s*, and in some other words, gave *ilis* In OE, the latter came down as *il*, e g *April em*, *Avril*, April, the former regularly lost the post-tonic *I*, and became *-el* (for *-l*), as in *humuel em* humble, *habil em* able, *fragil em*, *fraisle fraile*, *frêle* frail, *gracil em*, *graisle*, *gresle*, *grêle* L words *adapted* in OF at an early date took the ending *-il* MISC, *-ile* fem, e g *cevil*, *cevile*, later words have the ending *ile* only, as *agile facile*, *fossile* Very few of these words in Eng have the suffix in *-il*, e g *civil*, *fossil*, *utensil*, in the 17th c we find occasionally *-il* for L *-ilis*, e g *difficil*, *docil*, *fertil*, *steril*, but modern usage in Eng as in French has levelled *ilis* and *ilis* under the common form *ile* In Walker's Pronouncing Dictionary *ile* from *-ilis* is pronounced (-əl), and *ile* from *-ilis* as (-il), but the more recent tendency is to extend (-əl), with some exceptions, to all the words

Ill (il), *a* and *sb* Also 2 ile, 4 ille, (4 hil(l, hyl), 4-5 yll(e, 4-7 ill, (5 el, 9 yle) Early ME *ill, ul*, ON *illr* ill, bad, wicked, difficult, injurious, etc Ulterior etymology unknown, not related to OE *yfel* EVIL

As an adjective, *ill* is now much less used in general Eng, but than as an adverb, and survives chiefly in a few combinations, as *ill health, ill humours, ill temper, ill success*, as an adverb (the opposite of *well*), it is, in certain constructions, strongly limited to the sense which it qualifies, e g *ill advised, ill bred, ill conditioned, ill spelt*, etc In imitation of these, apparently, and from the feeling that it is not a general adjective, but one that goes only with particular nouns, the adjective is also often hyphened to its sb, as in *ill humour, ill will*, etc , but this is quite unnecessary when the *humour* stands to *ill humoured* just as *grey hair* to *grey haired*

Although *ill* is not etymologically related to *evil*, the two words have from the 12th c been synonymous, and *ill* has been often viewed as a mere variant or reduced form of *evil* This esp in Sc, where = between two vowels early disappeared, and *deil, eel, creature, greet*, = *devil, Nicol, became deil, eel, creature, greet, shool, scream*, so that *evil* might have become *eil* hence, in 15-16th c Sc, *eil* was found often written where *ill* was the word pronounced e g

Im-[1], assimilated form of the suffix In-[2], before *b, m, p.* This assimilation took place in Latin during the later classical period, and remains in French and English (although *in-* (*en-*) was not infrequent before *p* in OF and ME) In words that survived in living use, L *in-, im-* became in OF. *en-, em-*. These words were taken into ME in their current Fr. form, but from the 14th c. onward, there was a marked tendency to alter the French back into the Latin form of the prefix Hence, many words are found with both *em-* and *im-*, in some cases one, in some the other, being ultimately prevalent, while in others, as *empanel, impanel*, the variation still continues. see Em-, and In-[2]. In this Dictionary, words thus varying in the prefix are treated under the prevalent spelling, or under that which analogy favours, whether Em- or Im-, a cross-reference being given under the other spelling In words more recently derived from Latin (or from Italian) *im-* is the regular form

Words in *im-* are chiefly verbs and their derivatives, and may be thus classed:

a. Words in *im-* taken from L (or Romanic), directly or through later French, as *imbibe, imbue, imburse, immerge, immure, impact, impede, impend, implore, imprecate* **b** Words in which OF *em* has been altered back to *im* in AF or Eng, as *impair, impeach, implead, impoverish* **c** Words formed in Eng on the analogy of the proceding, from sbs., adjs, or verbs, not only of Romanic, but also of native Eng or other origin The earlier of these began with *em-* (being the form of En- before a labial), which was afterwards altered to *im* (as in b), after this, later formations arose with *im* from the first Such are, from sbs, *imbarge, imbrute, immantle, immould, impalace, imperil, impocket, imbark, imbarn, imbook, imbud, immind, immure, immud*, from adjs, *impeevish* (cf *imbrutish*), *impoor*, from verbs, *imbake, imbreathe, imbrighten, impaire, impight, implunge, impleach* In some of the last, *im* may have been felt as a variant of In-[1] For the sense expressed by the prefix, see In-[1].

In words in *imm*, usually only one *m* is pronounced, but when a rhetorical stress is laid on the prefix, or it is necessary to make plain its force in a nonce word or an unusual word, as *immind, immure, immud*, both *ms*, or a prolonged *m*, may be pronounced

Im-[2], assimilated form in L of the negative prefix In-[3] before *b, m, p*, which retains the same form in English, as *imbonity, immemorial, impossible* In *imm-*, only one *m* is ordinarily pronounced (the prefix being thus reduced to *i-*), but *im* may be kept separate where emphasis or distinctness requires, as in *im-malleable, im-mixed*

2 An optical appearance or counterpart of an object, such as is produced by rays of light either reflected as from a mirror, refracted as through a lens, or falling on a surface after passing through a small aperture

Such an appearance may also be a mere subjective impression on the sense of sight, as an After-image (q v), and the *negative* or *accidental image* seen after looking intently at a bright coloured object and having a colour complementary to that of the object

An image produced by reflexion or refraction is called in Optics a *real image* when the rays from each point of the object actually meet at a point, a *virtual image* when they diverge as if from a point beyond the reflecting or refracting body
